PRELIMINARY AMENDMENT

Honorable Commissioner of  
Patents & Trademarks  
Washington, D.C. 20231

Sir:

This preliminary amendment amends original claims 1 - 12 by rewriting them and adds new claims 13 - 18. The abstract has been amended by adding reference numbers to the drawings. No new matter has been added.

IN THE ABSTRACT

Please amend the abstract as follows:

A network address translation gateway (20) provides normal network translation for IP datagrams traveling from a local area network (10) using local IP addresses to an external network (30), but suspends source service address (port) translation when the port is reserved for a specific protocol, such as the ISAKMP "handshaking" protocol that is part of the IPSec protocol model (FIGs. 2 & 3). ISAKMP exchanges require both source and target computers to use the same service address (port). By providing a network interface that does not translate the source service address (port), this gateway enables the initiation and maintenance of secure, encrypted transmissions using
